Phishing Email Detection & Awareness Report

Prepared by: Sanya Bhatia

Tool Used: Email Header Analyzer, Browser Tools

Date: May 2026

Executive Summary

This report analyzes sample emails to identify phishing indicators such as spoofed senders, fake domains, suspicious links, urgency-based language, and credential theft attempts. The assessment classified emails as Safe, Suspicious, or Phishing and provides awareness guidelines to help users avoid phishing attacks.

Methodology

The analysis followed these steps:

1. Reviewed sender details
2. Checked subject and message content
3. Inspected links and domains
4. Reviewed attachments
5. Checked email headers where available
6. Classified risk level

Email 1

Subject: Urgent: Your Account Has Been Suspended
From: support@secure-victimbank.com

Dear Customer,
We detected unusual activity. Verify immediately: http://victimbankib-secure-login.com/verify

Questions:

1. List 3 red flags: fake urgency, sender address, fake domains

2. Type of attack: phishing

3. What should the user do? contact the bank directly

Email 2

Subject: Work From Home Opportunity – Earn $2,000 Weekly
From: hr@global-payment-services.net

Send your bank details to apply.

Questions:

1. List 4 warning signs: asking for bank details to apply, unrealistic amount, no job role mentioned

2. What role is being recruited? not mentioned, red flag

3. Is this legal? Why? the email itself is legal, but if it's a real job recruitment they could be doing it for money laundering so that's illegal

Email 3

Subject: Delivery Failed – Action Required
From: delivery@fastship-express.com

Confirm details: http://fastship-tracking-update.net

Questions:

1. What is suspicious? no delivery tracking id,

2. Why does recent ordering matter?

3. What should you do instead? check on app or call customer service

Email 4 : Safe Sample

Subject: Your Monthly Internet Bill is Ready

From: billing@telstra.com.au

Dear Customer,

Your monthly internet bill for May 2026 is now available.

You can securely view your bill by logging into your official Telstra account through the company website or mobile application.

Official Website:
https://www.telstra.com.au

Thank you for choosing Telstra.

Regards,
Telstra Billing Team

Justification for All the Email Samples

Email	Classification	Risk Level	Reason
Email 1 – “Your Account Has Been Suspended”	Phishing	High	Uses urgent language, fake banking domain, and malicious verification link to steal credentials
Email 2 – “Work From Home Opportunity”	Scam / Suspicious	High	Unrealistic salary offer and requests sensitive bank details, indicating possible financial fraud
Email 3 – “Delivery Failed – Action Required”	Phishing	Medium–High	Fake delivery tracking link and social engineering tactic designed to trick users into clicking malicious links
Email 4 – Monthly Internet Bill	Safe	Low	Legitimate sender domain, professional formatting, no credential request, and official HTTPS link

Common phishing techniques include:

- Fake login pages
- Spoofed email addresses
- Urgent payment requests
- Account suspension warnings
- Malicious attachments
- Fake delivery notifications

Prevention Guidelines

Users should:
- Check sender email carefully
- Hover over links before clicking
- Avoid opening unknown attachments
- Never share passwords or OTPs
- Use multi-factor authentication
- Report suspicious emails
- Verify urgent requests through another channel

Conclusion

The analysis shows that phishing emails often rely on urgency, fake domains, and social engineering. Regular awareness training and careful email inspection can reduce the risk of credential theft, malware infection, and financial loss.
